Purpose

1.0 Purpose

a) This standard provides requirements for the proper conditions necessary to protect Architectural Woodwork and related interior finishes (henceforth referred to as "Product" from the negative effects of temperature, relative humidity, and handling. Responsibility is defined for the care and moisture considerations before, during, and after installation.

b) Post-delivery conditions, including relative humidity requirements before, during, and after installation, are covered in this standard.c) Quality assurance can be achieved by adherence to this standard, which will provide the owner a quality product at competitive pricing. The design professional, by specifying compliance to this standard, increases the probability of receiving the product quality expected.

c) Quality assurance can be achieved by adherence to this standard, which will provide the owner a quality product at competitive pricing. The design professional, by specifying compliance to this standard, increases the probability of receiving the product quality expected.
